

11th Annual Glendale Health Festival to Provide Free Dental, Vision, and Medical Care for Children and Adults

The Glendale Health Festival is once again partnering with Remote Area Medical, a national non-profit that operates mobile medical clinics, to offer comprehensive health screenings and education. This two-day festival is a free event and is open to the entire community.

When: Saturday, November 5 and Sunday, November 6, 2022, beginning at 9:00 a.m.

Where: Pacific Community Center, 501 S. Pacific Avenue, Glendale, CA 91204

The Glendale Health Festival is designed much like a routine doctor visit. Services begin at the triage area, where volunteers take pertinent information from attendees. Following blood pressure, cholesterol, and blood sugar screenings, attendees will receive a consultation with a licensed physician who will make individualized recommendations.

- Licensed eye care specialists performing eye exams and glaucoma testing with eyeglasses made on site
- Dental extractions, fillings, cleaning, and screenings with licensed dentists
- Women's health screenings featuring mammograms and pap smears
- General medical physicals, hearing tests, flu shots, glucose & cholesterol screening, blood pressure check
- Bone density screening
- On-site drug disposal, medical consultations
- Cancer screenings will be offered to appropriate patients
- Education for the entire family will be available including mental health, high blood pressure, diabetes, obesity, weight management, proper nutrition, heart disease, cancer awareness, and more
- Addiction awareness

“The Glendale Health Festival is such a unique event because of the extensive services we offer, all of which are free to the public.” says festival chairperson Dr. Michael Aznavour. “It is particularly meaningful because this allows the community’s most vulnerable to receive healthcare they would otherwise not have access to. This is all made possible thanks to the generous participation of dozens of dedicated healthcare professionals, volunteers, and community organizations.”
